https://edjiron.netlify.app/ | github.com/jironDev | www.linkedin.com/in/edjiron

Full Stack Developer focused on building reliable, efficient, and user-centered web applications. Passionate about solving real-world problems through clean architecture, thoughtful design, and modern practices.

PROJECTS

Coffee CRM (Backend) — GitHub
Secure REST API featuring JWT authentication, bcrypt hashing, and full CRUD operations.
Developed with Typescript, Node.Js, Express.Js, PostgreSQL and Prisma ORM, emphasizing scalability, data integrity, and performance.

Coffee CRM (Frontend) — Demo | GitHub
Modern React-based frontend with authentication, and Excel import/export functionality.
Built using TypeScript, React, Vite, Bootstrap, and Material UI.

Weather App — Demo | GitHub
Responsive React application consuming the OpenWeatherMap API.
Implements async data handling, error management, and a clean, mobile-friendly UI.

EXPERIENCE

- **Freelance Full Stack Developer** — *Nicastream S.A.*
  Mar 2025 – Present
  • Designed and developed a complete CRM system for client, order, and billing management.
  • Built and deployed the application using TypeScript, Node.js, Express, PostgreSQL, Prisma ORM, and React.
  • Deployed on a VPS using Docker, with Nginx configured as a reverse proxy for routing.
  • Collaborated directly with stakeholders to define requirements, streamline workflows, and deliver a tailored solution that improved operational efficiency and client tracking.

SKILLS

Languages & Frameworks: HTML | CSS | JavaScript | TypeScript | React | Bootstrap | Material UI | Node.js | Express

Databases: PostgreSQL | Prisma ORM
Tools & Others: Git | Docker | Nginx | Linux

EDUCATION

Free Code Camp 2023-2024

- Responsive Web Design – Free Code Camp 2023
- JavaScript Algorithms and Data Structures – Free Code Camp 2024

Self-taught 2024-2025
React and backend with NodeJs, Typescript, Express.Js, PostgreSQL, Prisma ORM and deployment with Docker, Nginx and linux focused on Vps hosting.
